

EEE598 Introduction to Complex Networks  
Spring 2018

List of final projects  
3/19/2018

- Chendi Han: Quantum random walk and Page rank
- Junjie Jiang: Is linear controllability of complex networks useful?
- Hari: Dynamics of language with networked structure
- Derrick Johnson: Complex network structure identification from LDMOS data set
- Nikhil Ravi: Network inference to estimate crowd dynamics
- Aniket Shirsat: Linear time varying networks as a modeling and control framework for a network of mobile agents
- Chengzhen Wang: Predicting scientific area development via novelties creating rate
- Zhidan Zhao: Empirical analysis growth of knowledge in science
